

# CA on CD and CI on CD

## Important Information for 2007

Beginning with 2007 January CA on CD new Client Security software must be installed to enable proper functioning of CA on CD. Proper installation of the programs and the security drivers is essential for access to 2007 CD on CD and your existing prior databases.

<b>Windows</b>	<b>Windows Server / Client Installation</b> <ol style="list-style-type: none"><li>1. From your server start menu, run <i>setup.exe</i> from CD-ROM #1 to launch the Master Installer and follow the program prompts.</li><li>2. Ensure that the program software for CA on CD from CD-ROM #1 is installed before installing or copying the 2007 database to your server.</li><li>3. After the server installation has completed, from each client computer, run "Update Client" from Start   All Programs   CA on CD.</li><li>4. On each client computer, login with Administrator Privileges and then do Start   Run "<a href="#">\\server\directory\HASP\haspdinst.exe -i</a>" substituting the UNC name of your server and the CA on CD shared directory for <a href="#">\\server\directory</a> in the example path to install the client HASP device drivers. <b>Note:</b> You may also run <i>haspdinst.exe</i> directly from the HASP directory on CD-ROM #1 mounted in the client PC. <b>Note:</b> Once the HASP device drivers and the program update have been installed on client computers, as Administrator, then the program will function for other security groups and individuals such as Authenticated USER or Power USER.</li></ol>
<b>Macintosh</b>	<b>OS X Server / Client Installation</b> <ol style="list-style-type: none"><li>1. Unmount the OS X server and database volumes from each OS X Client desktop.</li><li>2. On the OS X server, Drag and Drop the CA on CD OSX folder from CD-ROM #1 to the folder with the same name on your OS X server, replacing the existing folder. <b>Note:</b> Ensure that the 2007 CD on CD database is installed on OS X database server before remounting the database volume on OS X clients.</li><li>3. On each Client, Remount the server volume on each OS X client desktop.</li></ol> <p>For complete installation instructions, read the <i>Instruct.pdf</i> document on CD-ROM #1.</p> <p>Your HASP key must also be updated for the 2007 CA on CD license. Contact CAS Customer Care to obtain your HASP Update Code, if you have not already received that code.</p> <p>CAS Customer Care: Phone: 800-753-4227 (North America) VoiceMenu Option 2 614-447-3700 (Worldwide) Fax: 614-447-3751 E-mail: <a href="mailto:help@cas.org">help@cas.org</a></p>
