Database News

- IFIPAT, IFICDB, and IFIUIDB reloaded with search and content enhancements
- DGENE, PCTGEN, and USGENE now include new local percent identity feature for sorting BLAST answer sets
- PCTGEN enhanced with patent family and legal status display data from INPADOCDB
- Addition of DISPLAY SCAN format to selected STN databases

Take Note

Searching for Polymer Information on STN - updated documentation available

Polymer information is found in many STN databases. From the perspective of the polymer scientist, some databases may be of greater interest than others, but relevant information on polymers and applications may be found throughout STN. This user guide is aimed at assisting the polymer searcher in retrieving information of interest from the most likely source databases in STN.
